Welcome

The theme of the HMI Annual Conference 2018 is making the vision set out in Sláintecare a reality for service users and providers.

The first part of our day will look to the bigger picture and the emerging economic and demographic context which the national strategy is designed to address. The challenges in establishing a high level plan for the implementation of the strategy will also be discussed.

During the conference, we will look at what needs to be done now and discuss the levers which can be used to make a difference, such as utilising ICT capability and enhancing management practices.

In the second part of the day, we greatly look forward to welcoming the Minister for Health, Mr. Simon Harris T.D. to address the conference on his expectations of healthcare managers as

leaders for the implementation of the national strategy. A high level panel will debate the opportunities for a new style of management in a healthcare system focussing on the sometimes conflicting challenges of greater accountability, openness and transparency, and no-fault liability.

Once again, I look forward to welcoming our members and other delegates to a very interesting and informative conference.

Lucy Nugent
President HMI

Who is it for?

The conference is designed for senior managers in the Irish health services: Chief Executives, members of Hospital Boards, Clinical Directors, Directors of Nursing and Heads of Services. It will also be of significant interest to policy makers, service users, educators and other stakeholders involved in transforming the Sláintecare vision into reality.

About HMI

The Health Management Institute of Ireland (HMI) is the professional body for healthcare managers across all sectors of the health service in the Republic of Ireland. We are a membership organisation. Our primary aim is the continuous development of standards of management competence and practice. The HMI meets the needs of the modern healthcare manager through informing, educating and involving its members and stakeholders in professional development and networking activities.

ie.gsk.com

GSK is a science-led global healthcare company. We research and develop a broad range of innovative products in three primary areas of Pharmaceuticals, Vaccines and Consumer Healthcare. We employ more than 96,000 people in over 100 countries, over 1,800 of whom are in our 5 Irish sites and businesses. We have three global manufacturing sites and a consumer healthcare and pharmaceuticals business based in Dublin. Resourcing a progressive and sustainable healthcare system is extremely challenging. At GSK, we want to play our part in helping ensure Irish patients and consumers can access the healthcare they need. We want to work in partnership with Government, policy makers, healthcare professionals, patients and citizen groups. We all have our part to play in tackling the challenges Irish healthcare faces, and we hope by working together openly, together we can help create a healthier Ireland.
